Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

Art Unit: 2187

DETAILED ACTION

- 1. This is a response to the amendment, filed 11/24/03.
- 2. Claims 1-20 are pending. Claims 18-20 are newly added.
- 3. Correction: The previous rejection to claims 1-3,9,10,12 using Aref et al should have been under 35 USC 102(b), not (e), since the cited art is published more than 1 year before application by Applicant.

Claim Objections

4. Claim 17,20 are objected to because of the following informalities:

(claim 17, line 4) "band" should be --bank--..

(claim 20, line 3) "band" should be --bank--..

Appropriate correction is required.

Response to Amendment/Arguments

5. Applicant amendment and arugments, filed 11/4/03, are not persuasive to overcome the previous prior art rejection. As to claims 1-3,9,10,12 Applicant argues that Aref does not teach the limitation of maintaining the order of requests within each thread. The Examiner interprets the claim language "maintaining order of requests" as keeping/servicing the requests in some kind of order, not necessarily in any specific order. That is, the requests are serviced and tracked. Aref teaches receiving multiple requests and servicing these requests. Since Aref teaches queuing,

Application/Control Number: 09/977,510

Art Unit: 2187

ordering, and tracking the disk requests, obviously in some kind of order, Aref satisfies the limitation of "maintaining" the order of the requests.

6. As to claims 1-17, Applicant makes the same argument as above. The Examiner disagrees with Applicant. The Examiner interprets the claim language "maintaining order of requests" as keeping/servicing the requests in some kind of order, not necessarily in any specific order since the claim did specify further. Since Rixner teaches a scheduler to keep the requests in some sort of order, the Examiner maintains that Rixner meets the limitation of the claimed invention.

Claim Rejections - 35 USC § 102

7. Claims 1-3,9,10,12,18,19 are rejected under 35 U.S.C. 102(b) as being anticipated by Aref et al (USP 6,023,720).

As to claims 1,2,10,12,18:

8. Aref teaches a disk scheduling system. Aref teaches scheduling access to a resource comprising: combining quality of service (QOS) scheduling for processing request threads, that substantially maintains QOS for each thread, and resource scheduling, that substantially maximizes resource efficiency (guaranteeing QOS by efficient resource scheduling; 4/14-64). Aref teaches substantially maintaining QOS for each request thread by maintaining/guaranteeing QOS to the access/read requests (MSFS 12; 4/14-33). Aref teaches resource scheduling to maximize resource efficiency by performing resource/disk scheduling to minimize seek time and guaranteeing data delivery at specified time(4/34-64).

As to claim 3,19:

Page 3

Art Unit: 2187

- 9. Aref teaches the stages are ordered to determine an order of requests to meet QOS guarantees and determine an order of requests for resource efficiency such that if the resource efficiency order satisfies QOS guarantees, a request is scheduled according to a first resource efficiency order, else a request is schedule in accordance with a second resource efficiency order (schedule request based on EDF algorithm to guarantee QOS; 4/5-39).
- 10. Claims 1-20 are rejected under 35 U.S.C. 102(a) as being anticipated by Rixner (Memory Access Scheduling, 2000).

As to claims 1,2,10,11,12,18:

11. Rixner teaches combining scheduling of requests and scheduling of request and maintaining order of requests while maintaining QOS scheduling and resource scheduling (memory access scheduler, pg. 2 col 2 - pg. 3 col 1; pg. 4 col 1).

As to claim 3,19:

12. Rixner teaches determining an order of requests to meet QOS guarantees (scheduling base on request arrival; pg. 1 col 1; pg. 7 col 2 - pg. 8 col 1);

determining an order of requests for resource efficiency (pick scheduling policy; pg. 4 col 2, Table 1); and

if the resource efficiency order satisfies QOS guarantees, and order is maintained, scheduling a request according to a first resource efficiency order, else scheduling with a second resource efficiency order (pick best scheduling policy; pg. 4 col 2, Table 1).

Art Unit: 2187

As to claims 4-6,13-15:

13. Rixner teaches maintaining and using a thread scheduling/access history(bandwidth usage), to determine scheduling of threads (use most pending policy schedules access base based on the most demanded row which means that a history is kept of the bandwidth usage to determine which is the most demanded/highest bandwidth; Table 1).

As to claim 7:

14. Rixner teaches maintaining prioritizing threads according to bandwidth usage and sequencing requests (use most priority policy which schedules access base based on the most highest priority operations.; Table 1).

As to claim 8,16:

15. Rixner teaches scheduling based on cost-function scheduling (fewest pending policy which weighs fewest pending and most pending policies to perform access; Table 1).

As to claim 9,17,20:

16. Rixner teaches scheduling for DRAM and deciding which bank to use (memory access scheduling for DRAM; pg. 1 col 2; pg. 3-4).

Conclusion

17. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CAR 1.136(a).

Application/Control Number: 09/977,510

Art Unit: 2187

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CAR

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this

final action.

18. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Than Nguyen whose telephone number is (703) 305-3866. The examiner

can normally be reached on M-F from 8:00 a.m. to 3:00 p.m. EST.

19. Any inquiry of a general nature or relating to the status of this application should be

directed to the Group receptionist whose telephone number is (703) 305-9600.

20. The fax phone number for Art Unit 2187 is 703-308-9051 or 703-308-9052.

Than Nguyen

Primary Patent Examiner
